Career Summary

Front-end developer with almost a year of professional experience delivering 8+ production grade web applications and contributing to OniKanji (US-based SaaS). Strong in Ember.js and React, with TypeScript, responsive design, and automated front-end testing (QUnit). Seeking a long-term role to deliver pixel-perfect UI and to grow into backend development.

Experience

Corpovisuals (Jan 2025 – to present) [Link](#)

- Built and shipped 12+ Ember.js front-end applications integrated with JSONAPI and Rails Backend including 350k+ visitors per month website.
- Implemented modular, reusable components and UI patterns to ensure pixel-perfect layouts across 4K, 2K, FHD, tablet and mobile screens.
- Handled styling, refactoring and feature enhancements; reduced visual regressions through careful QA and targeted fixes.
- Wrote unit & acceptance tests using Ember QUnit and Ember testing helpers to maintain dashboard stability.
- Followed Git workflows (feature branches, PRs, rebasing) and participated in code reviews to improve code quality and delivery speed.

Tech Stack: Ember.js, JavaScript, SCSS, Bootstrap HTML5, QUnit Test.

OniKanji LLC (Part time) [Link](#)

- Built a production Sentence Assembly Quiz component in React + TypeScript + Tailwind CSS: drag-and-drop UI, dynamic state management, conditional validation and real-time feedback — accepted for integration into the application.
- Implemented Kanji search handling features, and delivered bug fixes and UI improvements across the app.
- Improved and submitted AI integrated Python audit scripts for reading and auditing CSV files.
- Collaborated with US-based engineering team via GitHub/Discord; followed task-based workflow and delivered features on schedule.

Tech Stack: React, TypeScript, Tailwind CSS, Python (automation script), Git/GitHub, REST APIs.

PROGRAMMING & SOFT SKILLS

Front-end:	JavaScript (ES6+), TypeScript, Ember.js, React, HTML5, CSS3, SCSS, TailwindCSS.
Back-end (working knowledge):	Node.js, Express, MongoDB — comfortable building CRUD APIs and basic auth; learning SQL/Postgres and Rails.
Testing & QA:	Ember QUnit, acceptance testing, basic unit testing practices
Tools:	Gemini Cli, Qwen, AI, Git, GitHub, GitLab, Figma (basic), NPM, Yarn, Linux & terminal tools
Languages:	JavaScript, TypeScript, Python (basics), Ruby (basics), C (basics)
Soft skills:	Observant, active learner, adaptive, responsible

EDUCATION

Bachelor of Arts (Hons) in English — Bangladesh Islami University (2024), **Major:** English Literature — **CGPA 3.36**

LANGUAGE PROFICIENCY

Bangla (Native Speaker), **English** (Fluent and 2nd Language), **Urdu & Hindi** (Comfortable)
